OUR EXPERTISE

A UNIQUE INTENSIVE INFUSION TECHNOLOGY

Based on an infusion process, Rouages' **unique technology** makes it possible to obtain **aromatic profiles without the use of chemical solvents or additives**, preserving the **potency** of plants, spices and fruits.

This innovative process ensures that our infusions retain **the full aromatic spectrum** of the raw materials used.

OUR KNOW-HOW

Intense infusions

Beverage formulation 

OUR SOLUTIONS

FLAVOURING RAW MATERIALS

We use aqueous bases (water, juice, vinegar, etc.) or oily bases (rapeseed, sunflower, etc.) to create **intense infusions of fresh plants, fruit, flowers and spices.**

FUNCTIONAL INGREDIENTS

Our ingredients give your finished products **specific, targeted functions** (bitterness, warming, natural acidifier...).

BEVERAGES FOR DILUTION

By combining our infusion know-how, **we formulate** natural beverages for our customers. We can also offer you a turnkey solution for **natural beverages for dilution** or ready-to-drink: a natural beverage dispenser that can be adapted to suit your facilities and markets.
